Guarantee

We are vitally interested in the success of everything purchased from us. We will cheerfully advise you what, where and when to plant. We will advise you how to care for stock after planting. All products sold by us are of selected quality, and when promptly and properly planted and given ordinary care, should thrive under the severe climatic conditions peculiar to this section, where they are grown.

There are so many causes for failure over which we have no control that we cannot assume full responsibility after stock is delivered in good order. Poor soil, unfavorable weather, ignorant or careless culture, all contribute to failure and are beyond our control.

Our warranty insures the purchaser obtaining healthy vigorous plants true to name. When there is evidence of plants that died having been properly planted and cared for, we will replace any plants with the exception of Annuals or Greenhouse plants purchased from us that die within one year from date of purchase, at one half of our catalogue price.

We are prepared to furnish plans, specifications and quotations on landscape work of any magnitude. Our service includes grading, sodding, seeding and fertilizing lawns, spraying, pruning, furnishing plans, plants and planting. To create a beautiful landscape requires a knowledge of the principles of landscape design as well as a thorough knowledge of plants, their characteristics and habits of growth. Many factors must be considered, such as adaptability of plants to certain soils and to sun or shade. The height of plants at maturity, the type of foliage, the time and color of bloom are also important to create the best in landscape pictures. Competitive bidding encourages inferior planting and soil preparation, and the use of cheaper varieties usually not suited to the condition, thus producing an inferior landscape.

Every project that we do is distinctive and individual from the selec-

tion of plants to their final arrangements, insuring the very best in landscape results. Our landscape service includes the preparation of

plans and estimates as well as the construction work and planting for all phases of landscape work.
